## *there really is a Boogie!*

Boogie's diner is styled after the Baltimore diner where Boogie hung out with his friends. His offbeat adolescent antics were also the inspiration for the character "Boogie" in the hit movie "Diner", written and directed by his lifelong pal, Barry Levinson.

Boogie jokes that he opened his namesake diner out of necessity. As Aspen expanded and grew, he found it more and more difficult to get reservations at his favorite restaurants, so he created his own! Drawing on his retail background, he also created a full line of Boogie Wear, creating a unique mix of food and fashion under one roof.

ENJOY!!!
